

# Privacy Notice – COVID-19 vaccinations for individuals

## Plain English explanation

Part of the national response to the COVID-19 pandemic is the need to record the details of individuals who have been vaccinated against COVID-19. Vaccinations are normally undertaken in GP practice or community settings. With COVID-19 vaccinations, this will be undertaken in a variety of care settings and for the majority of individuals, vaccinations will be managed by “lead providers” on behalf of local health and care organisations. It remains the choice of the individual whether to have the vaccine, but Thamesmead Medical Associates need to be able to share individuals details with the lead providers to ensure all individuals are given the chance to receive their vaccination in line with the national requirements. We must also record the details of the vaccination and share that information with your GP, so that your health records are kept up to date.

Across England, a variety of lead providers and systems are being used to manage the vaccination process, which covers individuals requesting the vaccination, booking the appointment, and administering the vaccination. The sharing of this information is necessary to enable the coordinated and effective roll-out of this vaccination programme to individuals across England. Some of these providers are non-NHS organisations, details of which are available upon request by contacting the data protection officer at the details below.
